

FEVAL PROGETTI

Feval Progetti is a consulting company based in Italy, which provides IT and management consulting services to companies across Italy and Europe.

Profile

Feval Progetti covers three areas of competence: processes, technologies and applications. In those three lines of competence it offers consultancy, system integration and application management. The company operates in a variety of sectors, including Pharma, Food, Fashion/Textile, Utilities, Construction and Electronic.

Feval Progetti employs experienced international and multi-lingual consultants with the knowledge of in-depth business strategy in order to lead and support Clients to redefine, implement, organize their business and operational process. Methodology, precision and confidentiality are essential components of our professional team. This helps our clients, multinational and local companies, make strategic choices, successfully complete a project, and overcome new challenges of business applications and technology.

Consulting and Services in Evolution.
